

Registering RFID tag

Show the RFID tag to the card reader. The device will notify you that the card has not been registered and will ask for your credentials.

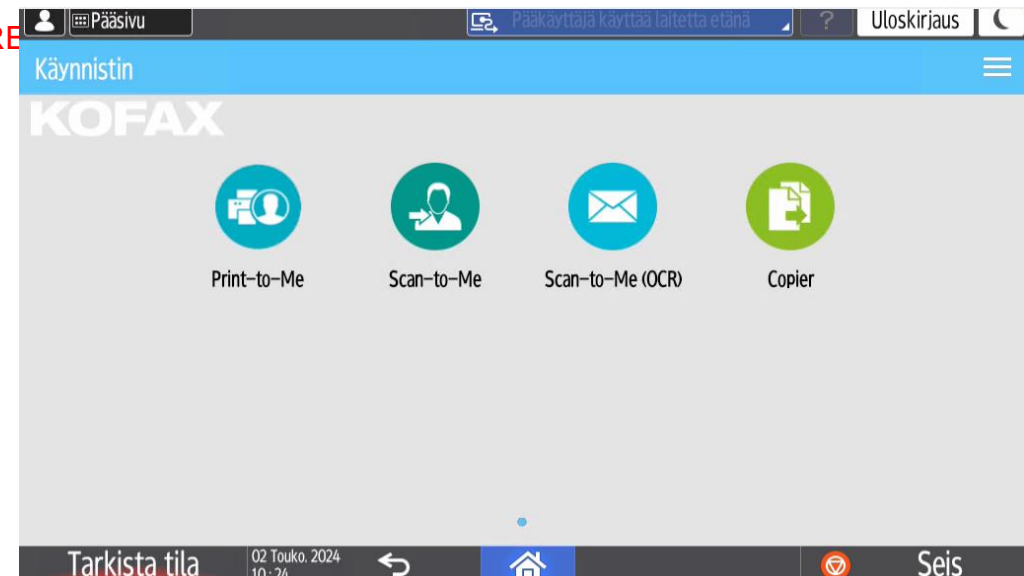

Enter your user ID or email address and password, and then select the blue 'Login' (Kirjaudu Sisään) button.

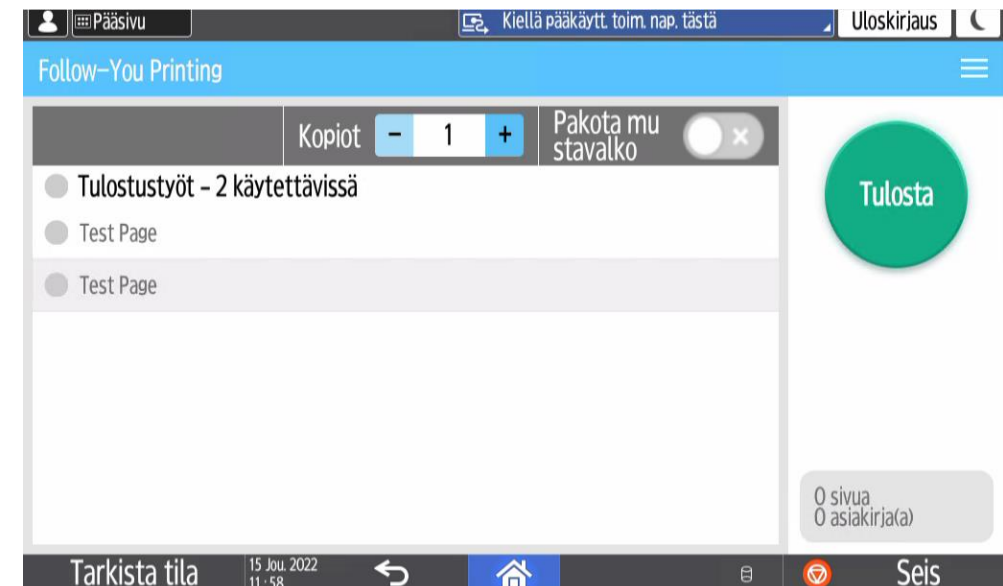

After this your RFID tag has been registered and you can login to the device by showing the card.

Secure print release and scanning

After logging in, you can choose Print-to-ME secure printing, scan-to-me e-mail scan, text recognized "OCR" scan, or the copy function..

With Follow-You secure printing, select the document(s) and press "Print" (Tulosta) to release your waiting print jobs. From the top right corner 'three-bar' menu, you can find additional options to delete, update or print and save the print job(s).

After completing all print/scan tasks, remember to log out from the device by showing the card again or selecting the logout button.
