

# FINNISH ARCHITECTURE AND DESIGN

## Intensive Weeks in Finland

Discover the future of architecture and design through an intensive **2-week summer school in Finland**, designed for students and professionals in the creative fields.

The program combines Finland's world-renowned design culture with hands-on, innovative learning in sustainable architecture, interior design, and Nordic aesthetics.

### Program Topics

- Sustainable Architecture and Urban Design
- Human-Centered Spaces – Understand how design impacts well-being and community life.
- Wood Construction and Ecological Materials
- Smart and Resilient Cities
- Design Thinking and Innovation Workshops – Apply creative problem-solving to real-life design challenges.
- Cultural and Field Visits to renowned architectural sites

### Innovative Methods

- Immersive Design Tours: Exploring innovation at Aalto University, the creative community of Fiskars Village, and the iconic Alvar Aalto design route.
- Collaborative Dialogues: Moving beyond traditional lectures with interactive, learner-centered sessions
- Applied Workshops: Bridging theory and practice through hands-on training on real-world skills and industry practices.
